

LUNCH AND LEARN SUMMARY:

ASSA ABLOY Entrance Systems would appreciate the opportunity to present the lunch and learn seminar titled: “**Overview of Automatic Doors**” to your office. The presentation will address the use and best practices of automatic door systems in all building types; an AIA/HSW accredited one-hour program.

Presentation Summary:

The program’s focus is on automatic pedestrian entrances including Swinging, Sliding, Folding, and Revolving. ADA compliant power operated door applications will be included. The presentation will familiarize attendees with the many complex standards and codes including the ANSI/BHMA standards that affect the design of power operated and revolving door entrances. Code compliant means of activation, the required safety systems, and energy conservation will also be reviewed. Upon the conclusion of this presentation the attendee will have an understanding of the criteria and good design practices which will allow the architect to make informed decisions when considering automatic entrances.

ASSA ABLOY Entrance Systems is the world’s most comprehensive supplier of entrance automation solutions for safe and efficient flow of people and goods. ASSA ABLOY Entrance Systems has a strong portfolio of global brands including Besam automatic pedestrian entrances; ASSA ABLOY sectional doors, high performance doors, and impactable dock doors; and Megadoor vertical lift doors which are all market leaders in their respective fields. Our solutions form a total offering for the front, back, and interior of your building.

I look forward to offering the presentation “**Overview of Automatic Doors**” to your company.
